

Collaboration Assessment Tool

Step 1

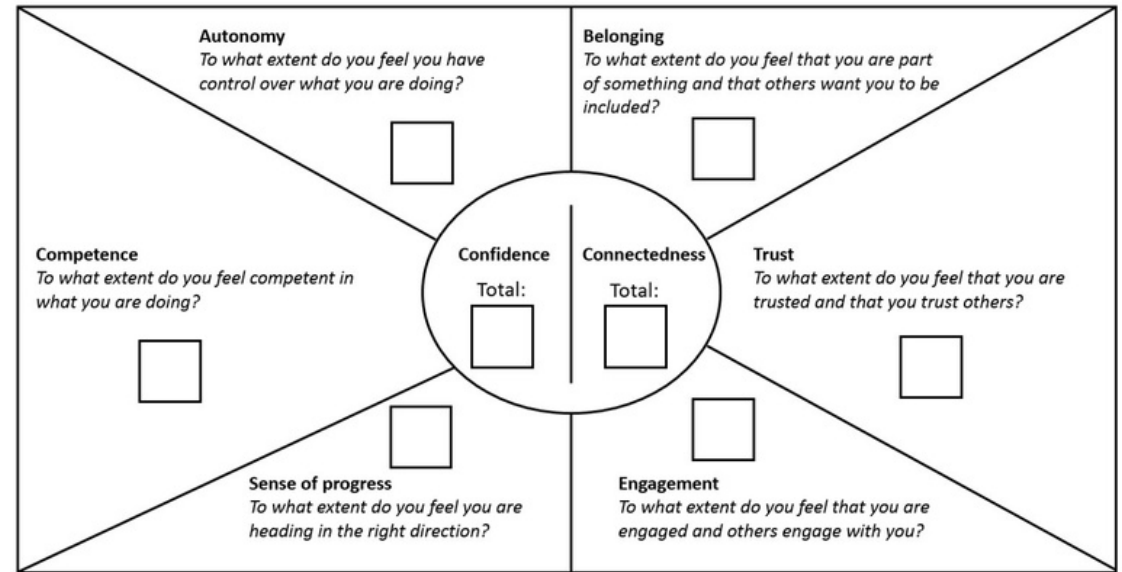

Our collaboration assessment tool involves you having to answer six simple questions around **CONFIDENCE** and **CONNECTEDNESS**. However, before you start, think about the context in which you'll be answering the questions. For example, think of a team or a work group that you are part of, or a particular situation that requires you to collaborate.

Write down the context/situation here:

Step 2

For each of the six questions (contained within the diagram on the right) give yourself a score between 0 and 10, where 0 is "not at all" and 10 is "totally". Enter your score for each question into the relevant box.

Once you have answered all six questions, enter your total score for **CONFIDENCE** and your total score for **CONNECTEDNESS** into the relevant "total" box.

Allan Ryan says:

"Over 70% of innovation comes from collaboration and less than 20% comes from creativity."

Effective collaboration comes from a high level of confidence combined with a high sense of connectedness.

How collaboration ready are you now?

Step 3

Now, simply add your total **CONFIDENCE** and total **CONNECTEDNESS** scores together.

What's your overall score?

Best practice scores are higher than 50. Median scores are between 40 and 50. Review your six individual scores and reflect on where you need to improve.
